# Action to be performed by vendors

## ■ Configurations definition

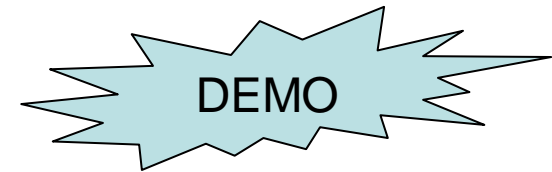

- Network Configuration Overview : information about network
- Systems Configuration : country's endpoints
- All configurations : All countries' endpoints

## ■ Public IP Addresses

## Action to be performed by vendors

- **Scrutiny tests** : vendors SHOULD begin to upload their samples for the EXPANDathon to Gazelle Platform. Monitors will validate them before (and during) the event.

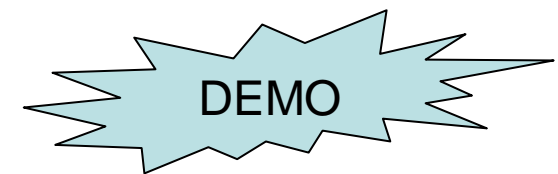

## Pre-EXPANDathon tests : results

- Only couple of systems finished the pre-EXPANDathon tests
- No feedbacks about vendors about the CDA validation tools
  - => vendors need to test their samples : the structure of the CDA PS has been modified by EXPAND CPs
